

PATROL TWO

Hand-held bio-acoustic bird dispersal and control

WORLD LEADERS IN BIO-ACOUSTIC BIRD DISPERSAL

EFFECTIVE, SAFE AND HUMANE TECHNOLOGY FOR A WIDE RANGE OF APPLICATIONS

SCARECROW
BIO-ACOUSTIC SYSTEMS
KEEPING BIRDS AT BAY

Scarecrow Bio-Acoustic Systems is perhaps the largest specialist and the acknowledged leader in bio-acoustic bird control technology, the reason why their products are 'preferred' by airport and airfield operators and at other strategic sites; anywhere that the presence of birds can present a safety or health hazard.

Scarecrow bio-acoustic bird dispersal systems are humane and inoffensive in their function, exploiting natural bird behaviour for their success. Scarecrow use naturally occurring bird distress calls, usually causing no noise intrusion or disturbance to humans.

Scarecrow Patrol Two represents an evolutionary development in bio-acoustic bird dispersal and control, designed for use anywhere that accurate and effective bird control is required – small airfields, beaches, at sea, landfill sites, bridge structures, public buildings, docks and harbours, fruit farms and agriculture, food processing and storage facilities, outdoor restaurants.

Scarecrow Patrol Two is fully portable, hand held, and contains nine digitally stored distress calls; Black Headed Gull, Common Gull, Crow, Herring Gull, Lapwing, Magpie, Pigeon, Rook and Starling. Additional species options can be included to special order. Scarecrow Patrol Two is completely self-contained, includes showerproof carrybag with a zipped compartment for spare batteries and is supplied with a comprehensive operator's manual.

Each call is selected by a simple rotary switch; the benefits of digital storage are uniquely strengthened by the fact that each distress call is reproduced with excellent fidelity from its natural start.

In addition, Scarecrow Patrol Two can be used as an attention-getting 'whistle' and for 'live' voice messaging, with a range of up to 350 metres.

Scarecrow Patrol Two is a development of the original Scarecrow product in use at civil and military airports, minimising birdstrike risk to aircraft and passengers for over 20 years, on offshore oil and gas installations, helidecks, and on ships in port, for all of which Scarecrow Bio-Acoustic Systems has long experience.

Technical Specification – Patrol Two 1307

Facilities:	a) Playback of bird dispersal calls b) Live voice announcements c) Attention getting whistle
Power output:	15 watts, 20 watts peak; effective S.P.L @ 10m: 101 dBA
Effective operation distance:	Approximately 350 metres, influenced by ambient temperature, wind direction, use of output power and reflection from surrounding buildings
Power source:	6 'C' size primary alkaline (9 volt total)
Battery life (approx):	Voice and bird distress function: intermittent use totalling in excess of 36 hours (120 days average use)
Whistle:	Intermittent use totalling 90 minutes
Body composition:	Manufactured in fire retardant, shatter resistant, ABS resin, ivory colour
Physical dimensions:	210mm max horn diameter. 320mm total length
Unit weight:	1.5 kg including power cells
Controls:	<ul style="list-style-type: none"> • Operational trigger – start of selected use • Select: bird dispersal or voice announcement use • Sound level adjustment • Push button, overriding, whistle
Bird distress calls:	Herring Gull, Common Gull, Black Headed Gull, Lapwing, Starling, Rook, Magpie, Pigeon, Crow
Order code:	Scarecrow Patrol Two – 1307
