

Scarecrow Director

Hand held public address system as used by the Royal National Lifeboat Institute, the London Fire Brigade and the London Fire and Civil Defence Authority.

SCARECROW
BIO-ACOUSTIC SYSTEMS

Director is more than just a hand held portable public address system; it can be a life saver, a vital safety tool.

Director portable public address systems are in use with many safety aware SPORTS STADIA, FACTORIES and POWER PLANTS as well as those who need to be involved in evacuation, gas or water leaks, rescues on land and at sea, traffic control and other safety operations.

Director portable public address is an integral part of the operations of the Royal National Lifeboat Institute, The London Fire Brigade, The London Fire and Civil Defence Authority and by military and civil authorities including police, fire and ambulance services generally.

Perfectly suited to crowd control, Director has a voice and signalling range of up to 350m and is an ideal supplement to permanent fire and personnel evacuation systems. Director will continue to function for up to 36 hours of intermittent use from 6 'C' size primary alkaline or rechargeable cells.

Director is fitted with a signalling 'whistle' for attracting the attention of personnel about to be addressed, or for simply warning of danger as in the case of use from a moving vehicle in a crowded area.

Director, as a portable public address system, can provide back-up to permanent systems for local control of incidents; there is no longer a need to rely on an unsupported human voice in emergency or safety situations.

Weighing only 1.5kg, marinised and manufactured from fire retardant, shatter resistant, ABS resin, Director has many unique features making it perhaps the only choice for such demanding operations. A safety wrist strap is an important inclusion.

Director is supplied with a selection of bright red user identification labels which can help to establish authority; easily legible and self-adhesive to the Director body.

A useful accessory is a splash and showerproof carrybag with a separate compartment for spare batteries.

Operation from an external power source, such as a vehicle cigar lighter socket, or inputs for external tape playback systems are extra cost features easily accommodated.

Director plus

Director *plus* includes a pre-recorded message – “passengers assemble over here” as standard – which can be played on demand or continuously, the latter even when Director *plus* is unattended, perhaps positioned on a wall whilst the operator is involved in the proceeding emergency.

Any required message can be specified on order placement at an additional cost. The recorded message shall not exceed 60 seconds in duration.

Technical Specification – Scarecrow Director 1356 and Director plus 1340

Power output: Rated 15 watts, 20 watts peak.

*Effective operational distance:

Voice: approximately 350 metres

Siren: approximately 450 metres

These approximations will be influenced by ambient temperature, wind direction, the maximum use of output power and reflections from buildings.

Power source: 6 'C' size primary alkaline or rechargeable cells (9 volt total)

Battery life (approx): Voice: intermittent use totalling 36 hours

Siren: intermittent use totalling 90 minutes

Operating temperature range: -10 degrees C to +45 degrees C

Physical dimensions: 210mm maximum horn diameter, 320mm total length

Unit weight (nett): 1.5Kg, including batteries

Order codes: Director – 1356. Director *plus* – 1340

Accessories included: Showerproof, soft carrybag

Assembled from components of Japanese origin, re-engineered in UK for the demanding tasks of emergency services, military, civil and industrial applications.
