

SCARECROW B.I.R.D. SYSTEM™

ATEX RATED / HAZARDOUS AREA

(Bird Instinctive Reactive Dispersal)

EFFECTIVE, SAFE, HUMANE TECHNOLOGY

HELIDECKS | OFFSHORE RIGS | CHEMICAL PLANTS

Patent Number 2531059

scarecrow
BIO-ACOUSTIC SYSTEMS
Nature Inspired Bird Dispersal

Scarecrow Bio-Acoustic Systems is perhaps the largest specialist and the acknowledged leader in bio-acoustic bird control technology, the reason why their products are 'preferred' by airport and airfield operators and at other strategic sites; anywhere that the presence of birds can present a safety or health hazard.

Scarecrow bio-acoustic bird dispersal systems are humane and inoffensive in their function, exploiting natural bird behaviour for their success. Scarecrow use naturally occurring bird distress calls, usually causing no noise intrusion or disturbance to humans.

What is Atex Rated Scarecrow B.I.R.D. System™?

Scarecrow B.I.R.D. System™ is a well researched bio-acoustic bird dispersal system using natural species distress calls to create an environment appearing 'hostile' to birds.

It is intended for use where **ATEX rated** equipment is required where birds present a hazard to health and safety, or are a plain nuisance.

Scarecrow B.I.R.D. System™ is a fully automatic, random play system that is able to work without human intervention. **Atex rated** systems can be powered from 15v DC (100v/250) ac mains power.

There is a built in key pad to control the settings on the system, and it has an optional security pin access feature for additional safety. It is fitted with a light sensor for use when mounting the system outdoors. If mounting indoors, a timer can be used.

Scarecrow B.I.R.D. System™ can hold up to a maximum of 30 speakers, and by using variable volume and alternation between the installed speakers it creates a natural perception of predator movement.

Key features for Atex Rated Scarecrow B.I.R.D. System™

- Pad lockable ON / OFF switch for security
- Can be supplied with MCB and bespoke TAG plates
- Available in either Aluminium or Stainless Steel
- IP66 Rated
- Rated to Zone 1 and also covers Zone 2

Accessories

Scarecrow Atex Rated B.I.R.D. System™ Technical Information

System includes:	Processor, built-in Long Line Transformer, Power Supply, Atex Zone 1 Rated enclosure
Controls:	Key pad control for Power on / off, volume up / down, light sensor, re-enforce and severe broadcasting, and distress call selection
Distress Calls:	10 standard calls: Herring Gull, Black Headed Gull, Starling, Rook, Crow, Pigeon, Jackdaw, Canada Goose 1 & 2, Birds of Prey (Call exchanges available)
Power Source:	Powered from 110v/240v AC mains supply
Enclosure Rating:	Atex Zone 1 Ex-d IIB + H2
Enclosure Dimensions:	364 x 319 x 241mm
IP Rating:	IP66
Audio Output Power:	3 audio channels, each one can host up to 10x2.5watt 100v line speakers
Warranty:	Standard 12 month return to base warranty

"The Atex device is working and we have seen a marked improvement regarding the amount of guano that is on the structure."
