Nature Inspired Bird Dispersal

What is Scarecrow Patrol Two?

Scarecrow is perhaps the largest specialist and the acknowledged leader in bio-acoustic bird control technology, the reason why their products are 'preferred' by airport and airfield operators and at other strategic sites; anywhere that the presence of birds can present a safety or health hazard.

Scarecrow Patrol Two represents an evolutionary development in bio-acoustic bird dispersal and control, designed for use anywhere that accurate and effective bird control is required – small airfields, beaches, at sea, landfill sites, bridge structures, public buildings, docks and harbours, fruit farms and agriculture, food processing and storage facilities, outdoor restaurants.

Scarecrow Patrol Two is fully portable, hand held, and contains nine digitally stored distress calls; additional species options can be included to special order.

Scarecrow Patrol Two is completely self-contained, includes shower proof carrybag with a zipped compartment for spare batteries and is supplied with a comprehensive operator's manual.

Each call is selected by a simple rotary switch; the benefits of digital storage are uniquely strengthened by the fact that each distress call is reproduced with excellent fidelity from its natural start.

In addition, **Scarecrow Patrol Two** can be used as an attention-getting 'whistle' and for 'live' voice messaging, with a range of up to 350 metres.

Scarecrow Patrol Two is a development of the original Scarecrow products used at civil and military airports, designed for use in those locations where a fixed system is not suitable and daily hand held manual operation would not create any issues.

Technical Specification – Scarecrow Patrol Two

Facilities:	a) Playback of bird dispersal calls b) Live voice announcements c) Attention getting whistle
Power Output:	15 watts, 20 watts peak; effective S.P.PL@ 10m: 101 dBA
Effective Operational Distance:	Approximately 300 meters, influenced by ambient temperature, wind direction, use of output power and reflection from surrounding obstacles
Power Source:	6 'C' size primary alkaline (9 volt total)
Battery life (approx):	Voice and bird distress functions: In excess of 36 hours for normal intermittent use (this is about 120 days of average use)
Whistle:	Intermittent use totalling 90 minutes
Body composition:	Manufactured in fire retardant, shatter resistant, ABS resin, ivory colour
Physical dimensions:	210mm max horn diameter, 320mm total length
Unit weight:	1.5 Kg including power cells
Controls:	Operational trigger – start of selected use Select – bird dispersal or voice announcement use Sound level adjustment Push button, overriding, whistle
Bird Distress Calls:	9 standard calls: Herring Gull, Common Gull, Black Headed Gull, Lapwing, Starling, Rook, Magpie, Pigeon and Crow (Call exchanges available)
Warranty:	12 months return-to-base, from date of purchase
Order Code:	Scarecrow Patrol Two – 1307

Scarecrow Goose Patrol

The Scarecrow Goose Patrol is physically identical to the Scarecrow Patrol, but contains four effective Canada Geese calls, together with those of Herring Gull, Black Headed Gull, Starling, Rook and Pigeon. The Goose Patrol has the same technical specification as above, and the order code for this product is 1309.

"I have been using the Scarecrow Bird Dispersal Unit since 2013; we had a particular problem with the Canada Geese on the course disrupting play. After introducing the periodic use of the unit through our green keeping team we no longer have the problem. I wouldn't hesitate to recommend the Scarecrow unit to anyone having similar problems."
